The Future of Health & Wellness Today

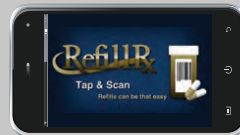

PHILOSOPHY

Bradenton Hometown Pharmacy is a locally owned community pharmacy that believes each patient deserves the utmost respect, care and attention. We always place great emphasis on individualizing personal care. We take great pride in getting to know each patient on a personal basis, understanding their health concerns and needs. We provide our patients with the necessary knowledge and information to help them enjoy long, healthy and fulfilling lives. It is our goal to be there for you.

CONVENIENCE

- All medications can be delivered directly to the patient absolutely FREE.
- We have an on-call pharmacist 24/7.
- We accept all commercial insurance plans, Medicare Part D and Medicaid.
- We offer routine drug interaction checks and FREE medication reviews.
- We include bubble dose packaging when requested absolutely FREE.
- Our easy online prescription system is available 24/7 and can send refill pickup alerts.
- Your patients will never need to miss a dose. We can call your office to initiate a refill authorization for improved medication adherence.
- We synchronize refills of all medications to save your patients trips to the pharmacy and assure they take medications as indicated.
- We offer charge accounts that allow your patients to be billed on a requested date.
- We support RefillRx Mobile, a one tap solution for refilling prescriptions. Simply scan the barcode on the bottle and watch as RefillRx Mobile sends the request to our pharmacy.

SPECIALTIES

Pain Management Compounding Topical and transdermal creams can be formulated to provide local concentrations at the site of application. Side effects associated with oral administration can often be avoided when medications are used topically.

Bio-Identical Compounding Hormone therapy can relieve the symptoms of andropause and menopause when a customized prescription is ordered. The advantage of compounded Hormone Replacement Therapy is it can be adapted to fit each of your patient's body and hormone levels.

Dermatology Medications We have the facility and skilled personnel to customize dermatological preparations that provide improved therapeutic outcomes. We compound medications for dermatological diseases when first line therapy fails or when a specific dosage form is necessary for your patients.

HIV/AIDS Management Managing the side effects, dosing schedule and pill burden associated with treatment for HIV/AIDS can be challenging. Allow us to take some of the time-consuming tasks of medication management off your patients' hands. We have an array of convenient services to make your life easier.

We offer specialty services for many other conditions. Including: Cystic Fibrosis, Multiple Sclerosis, Renal Disorders, Oncology, Psoriasis, Pulmonary Disorders and more.
